

**Individual Entrepreneur Mirkushin S.A.  
Production Company “Massiv”**

The main type of product of Production Company is high quality lamella from birch, which is used for furniture board and furniture, and also production of coniferous timber.

Usually, we produce furniture elements with humidity 6-8%. Nevertheless we can leave natural humidity; it depends on client's enquiry, who will dry it by himself.

The company was founded in 1995. Our production has a full technological cycle from logging, carting out, drying to production of lumber, furniture board, wooden euro windows and doors that guarantees constant quality control on each production level. The company has 35 high-qualified staff with wide experience.

The company has its own workshops, which are oriented on sawing, drying and wood treatment by different methods that allow setting up competitive prices on its products.

Our products can be used in following areas:

**Furniture elements:**

- tables and chairs legs
- point elements
- frames
- tabletops
- bedheads
- molding
- facades

**Interior elements:**

- Exclusive interior components
- framework of complex structures
- interior partitions, stained-glass windows;
- baseboard
- eaves
- ledges
- corners
- window sills
- door elements

**Stairs elements:**

- Steps
- cut strings
- handrails
- balusters
- newels

Production Company “Massiv” has a positive experience in lamella export for furniture boards in France for several years.

The company constantly develops and searches for new partners for long-term cooperation.
