

Company “Yaroslavskiy Shpon”

"Yaroslavskiy Shpon" - is a Russian company producing birch rotary veneer. Manufacturing is equipped with hi-tech facilities such as: rotary slicer by **Angelo Cremona** company, Italy; or dryer by **OLM Schilde** company.

Manufacture is located in Tutaev city, Yaroslavl region, in close proximity to wood suppliers - it helps provide the plant with high-grade raw stock. Veneer is packed on pallets and fastened with strip iron; upon customer's request veneer can be wrapped with polyethylene film. Veneer is shipped directly from the stock upon preliminary agreement with customers. We may help arrange delivery of birch veneer via transportation service company.

For the time of operating "Yaroslavskiy Shpon" company has proved itself as a stable and reliable partner in terms of production and sale of birch rotary veneer. We appreciate long-term business relationships therefore we offer products of best quality at the most reasonable prices.

"Yaroslavskiy Shpon" company is producing rotary birch veneer in full compliance with GOST 99-96 (all union state standard).

We produce veneer according to the following standards:

- grade: I, II, III, IV; waney, piece
- length: 1300 mm to 2100 mm
- width: up to 1900 mm
- thickness: 1.3 mm to 1.8 mm
- veneer moisture: 4 to 6%
